

Hello! I don't have the idea to start with this, as this is my first time doing this without any video guides, and viewing a documentation of payment gateway. To be transparent with you, I used a technology tool like ChatGPT to guide me with this assessment. I don't do have the idea what the first thing to do. I read a document what are the requirements or need to have a Merchant Payment Switch. I do breaking down the email you've sent and double checking it to fully understand it. I hope marami pa ako matutunan with this company and I was happy that it works.

## Test Bank Online:

1.) Screenshot the Dragonpay Pay.aspx payment method selection page (include the address bar).
